Integrated Surveillance & Intelligence System

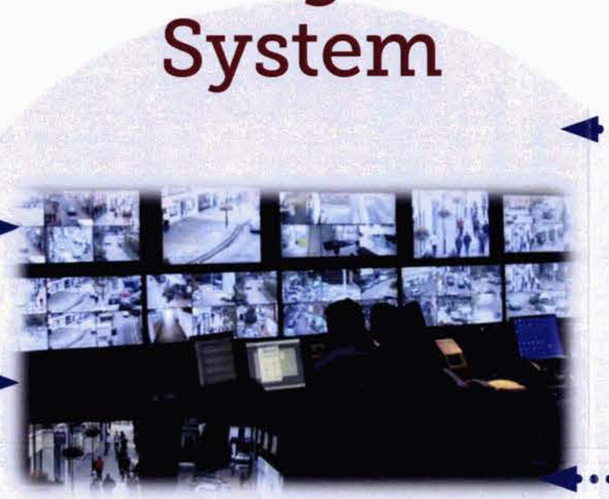
Static & Mobile IP based Video/CCTV Surveillance

MIDAS

Integrated Surveillance & Intelligence System

Marine Surveillance

Intel Office - Database Analysis & Face Recognition.



Aerial Surveillance

Central HQ/ Regional Command

Mobile Surveillance control

Patrol Car for Image Comms & Mobile Face Recognition

Ground Team Surveillance

Central HQ Command & Regional Command Centres

- *Central Control Room for live operational surveillance links to field teams & Regional Commands.*
- *Central Database Servers; Video Servers; Photophone & CrimeBase Server; Archiving System.*
- *Workstations linked to the Regional Command Centres.*
- *Database Intelligence Analysis Centre - Crimebase Surveillance Intelligence database with integrated Facial Recognition.*
- *Surveillance Tracking Centre; Video Analysis Suite; Multimedia Download Bureau; Audio/Video Enhancement Facilities.*

Vehicle Surveillance & Mobile Command

- *Vans/cars with digital communication links to Foot Surveillance Teams, Regional Command and/or Central HQ.*
- *Digital Video, Audio & Messaging communication links*
- *Aerial & Waterborne Surveillance vehicles with digital surveillance links.*
- *Motorcycle surveillance Units*

Foot Surveillance Teams

- *Digital surveillance cameras linked to Smartphone for automatic transmission of imagery.*
- *Body-worn surveillance devices (audio/video).*
- *Smartphones with Photophone XT for capturing, sending/receiving imagery & electronic documentation.*
- *Smartphones with FaceCheck for Mobile Facial Recognition of subjects.*

GAMMATSE
LIMITED

MIDAS

Integrated Surveillance & Intelligence System

- Encrypted Interactive Image / Data Transmission
- Intelligence Database
- Biometric Facial Recognition
- Audio/Video Surveillance Equipment

MIDAS IntelBase

Powered by ImageBase

Fully interactive surveillance database

MIDAS Facecheck©

Powered by ImageBase

Latest Biometric facial recognition can be used with smartphones

MIDAS AudioLink

Custom control software for audio installations

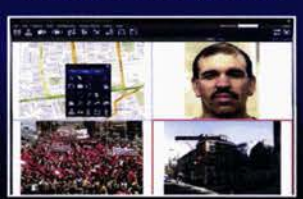
MIDAS Tracker

Custom control software for tracking installations

MIDAS VideoLink

Custom control software for video installations

MIDAS Photolink



Powered by ImageBase

Specialist system for surveillance photography direct to HQ and Operational teams

System Overview

Audit Trail

Full evidential audit trail within each facet of the system to comply with rules of evidence.

Secure User Groups

Secure link between surveillance operatives and HQ to share information.

Charting Associations

Ability to link associations between people, addresses and vehicles quickly, and link with existing analysis software.

Face Recognition Module

Latest biometric techniques allow the surveillance operators and HQ teams to check against databases quickly and securely.

Audio Module

Controls audio intelligence systems and transmitted audio signals from GSM modems, LAN, or other connected devices.

Video Module

Controls video intelligence systems, transmitted video signals from GSM modems, COFDM transmission and LAN, as well as full control over cameras and installed equipment.

Tracking Module

Control of tracking systems deployed to aid in the surveillance of targets, vehicles and map locations for ease of briefings and intelligence analysis.

Access via security VNP/Intranet

Secure transfer of information between intellibase intelligence databases, updating all databases in operation with the latest intelligence to the HQ Server.

Tasking & Messaging Facility

Operates on Notebooks, IPad, Android Tablet, BlackBerry, Android Phones and IPhone allows team leaders to send, receive messages and tasks quickly and easily.

Custom Modules

Gamma will write a GUI to suit your actual application to control specific devices or systems.

Please contact GammaTSE for your Midas system requirements and designs.
