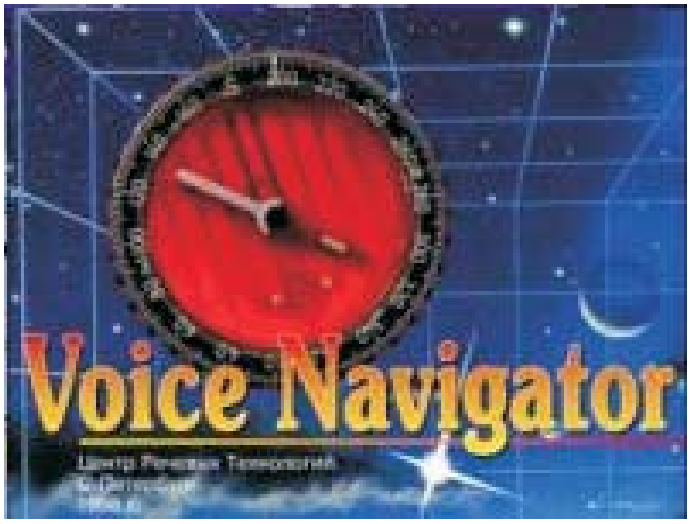
VOICE NAVIGATOR

Language Independent Voice Control of PC Programs



Applications

- Performs search and instant execution of any Windows application by voice commands.
- Used at home and office to save time finding an application labels in menus, windows, looking through folders, etc.
- Helps people with disabilities and in applications when PC user's hands are occupied.

Functional Features

- Is activated after the user pronounces a key-word which assures that the system will react only to the user's command, not to anything else
- Is easily trained to any voice
- Has a function of oral response and confirmation that the command is understood and the system is ready to perform it
- Has a feature of recognition improvement

Advantages

- Voice Navigator is a fun application based on VoiceCom software library that helps you take control of your computer using the power of your own voice
- Not dependent on any language or specific words
- Can easily open any Windows application, file, and folders purely by voice command.
- Recognizes up to 200 voice commands
- Adds new commands easily and quickly
- Noise robust, Voice Navigator gives good voice recognition even in a noisy environment.
- Link quickly by voice to your favorite web pages
- Uses little PC resources.
