

## NICE Intelligence Solutions

NICE Intelligence Solutions help Law Enforcement Agencies (LEAs), intelligence organizations and SIGINT agencies to reduce crime, prevent terrorism and identify other security threats by enhancing communication intelligence production. NICE Intelligence Solutions provide end-to-end solutions for communication interception and analysis. Developed by intelligence veterans and backed by in-house technology and built-in intelligence know-how, our solutions are deployed by dozens of experts around the world. NICE solutions help to extract intelligence insights and create a significant impact on criminal investigations. NICE Systems is a trusted solution provider and a global industry leader.

## NICE Intelligence Solutions include:

### NiceTrack Target 360°

NiceTrack Target 360° is an end-to-end solution for communication interception, analysis and investigation. The system supports the entire intelligence production cycle both in real-time and offline. The system is designed to provide hermetic 360° target monitoring by addressing the dynamic and complex nature of the communication world and specifically the Internet arena. To provide a comprehensive intelligence picture, the system includes 3D accurate positioning, advanced IP monitoring, Open Source Intelligence (OSINT), Lawful Hacking and speech analytics capabilities. NiceTrack Target 360° supports all types of telephony and IP data, including voice, email, SMS, video, chat and social networks in all types of communication networks.

### NiceTrack Horizon Insight

NiceTrack Horizon Insight is a platform for mass interception and analysis of very high volumes and rates of communication data (e.g., telephony, IP and open source). The platform is designed to automatically extract and produce valuable intelligence, detect and identify new targets and suspects from billions of voice, text, metadata and location events per day. NiceTrack Horizon Insight consists of algorithmic engines and predefined communication patterns to provide complex alerting for preventive intelligence.

### NiceTrack Collection and Processing Engines

NiceTrack software-based patented collection and processing engines guarantee efficient, cost-effective and smooth interception deployments at all communication networks and the processing of any type of data prior to the analysis stage.

Collection and processing engines include:

- **Location Tracking Engine:** 3D accurate positioning for mobile phones
- **Satellite Interception:** DCME and VSAT interception solutions
- **Speech Analytics:** Speaker and language identification, keyword spotting and speaker hunting

### NiceTrack Intelligence Consulting Services

NICE provides LEAs and intelligence organizations with a wide range of workshops, intelligence courses and on-site consulting services. These services help customers to mitigate criminal activities and security threats more effectively by improving intelligence production. Courses and workshops cover both specific areas of interest and broader issues, and are customized to accommodate any level of participants and any desired timeframe. All services are delivered by SIGINT professionals with vast experience in technological, operational and investigative aspects of intelligence work methods and processes.

## Key Benefits

NICE Intelligence Solutions are deployed by leading LEAs and intelligence organizations worldwide. As a NICE customer, your intelligence investment is supported by:

- Technology leadership
- Intelligence know-how
- Large, field-proven install base
- Global presence and local support
- Customer focus approach

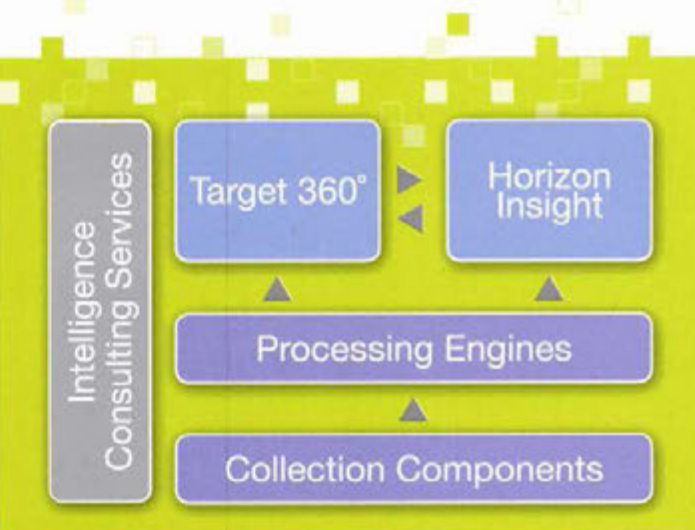

## Professional Services

Our seasoned team of professionals provide:

- 24/7 technical support
- Disciplined project management
- Smooth and rapid deployment
- High-quality customized training
- Industry-standard technical documentation

## ABOUT NICE

NICE Systems (NASDAQ: NICE), is the worldwide leader of intent-based solutions that capture and analyze interactions and transactions, realize intent, and extract and leverage insights to deliver impact in real time. Driven by cross-channel and multi-sensor analytics, NICE solutions enable organizations to improve business performance, increase operational efficiency, prevent financial crime, ensure compliance, and enhance safety and security. NICE serves over 25,000 organizations in the enterprise and security sectors, representing a variety of sizes and industries in more than 150 countries, and including over 80 of the Fortune 100 companies.
