NEW FEATURES 3.1

GPS TRACKINGS

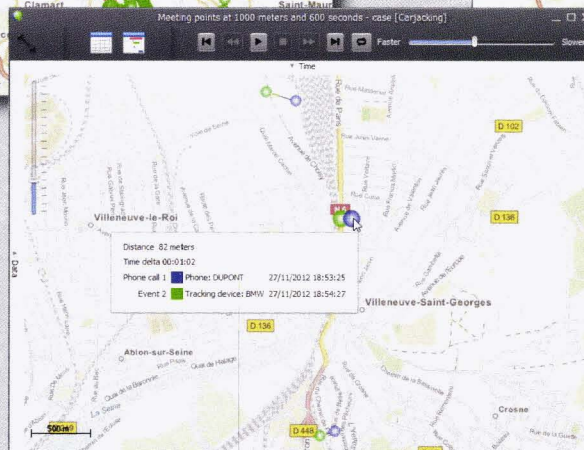

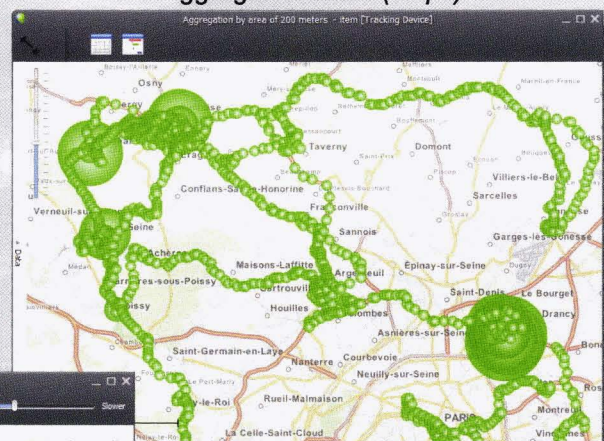

- Import in Mercure GPS trackings from various GPS devices.
- Visualise on maps short or long duration stopping areas.
- Identify phones that move simultaneously with vehicles.
- Search for phone calls near tracking points.

Step by step mode (trips)

Aggregated mode (stops)

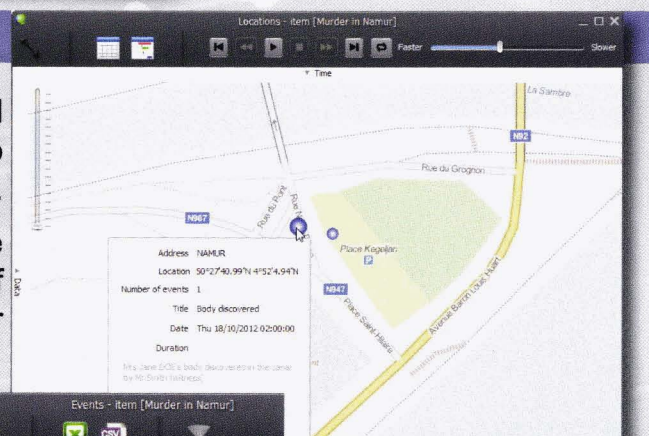

Search of simultaneous moves or locations between a phone and a vehicle

EVENTS

In Mercure 3.1, you can enter case-related events. You can even place them on a map to analyse your phone data with events perspective.

You'll be able to easily correlate for example a selection of itemised billings with a series of crimes, or just check if suspects are near one or several case events.

Events can be of different nature: inquiry facts, witness statements, clues, places of interest, ...

| Date | Time | Title | Description |
|----------------|----------|-----------------|---|
| Mon 15/10/2... | 01:00:00 | Kidnapping | Victim is kidnapped near her house |
| Tue 16/10/2... | 16:15:00 | Suspect seen | Suspect seen in a dark unidentified van |
| Thu 18/10/2... | 02:00:00 | Body discovered | Mrs Jane DOE's body discovered in the d |
