WIDE AREA

SURVEILLANCE SYSTEM

## 360° INTRUSION DETECTION, ANYWHERE, ANYTIME

Spynel is the impressive system for all-weather, 24/7 surveillance of ports, ships, platforms at sea, ideal for perimeters over several kilometers. This unique infrared sensor displays a full 360-degree panorama, with a resolution up to 30 Mpix. With its near real-time imagery, Spynel detects and tracks unlimited movements night and day. With a large MWIR focal plane array, Spynel-S exhibits high performance, especially in warm and humid regions.

## EARLY WARNING OF ASSYMETRICAL THREATS

Compact and fully passive, the Spynel is completely insensitive to jamming and deception. Unaffected by sea clutter, this surveillance device is highly effective when tracking small crafts, RIBs, wooden boats and swimmers. It can be a reliable and cost-effective stand-alone perimeter security solution as well as an added layer of capability to systems already in place.

## APPLICATIONS

- Maritime wide area surveillance
- Asymmetrical threats detection
- Seaports and harbors protection
- Coastal and border passive surveillance
- Offshore platforms and oil rigs security
- UAV, USV, low air target tracking
- Auto-protection of ships
- Fight against piracy
- Fight against smuggling and drug trafficking
- Night time navigation
- Search and rescue

→ RIBs detection and tracking

→ SPYNEL-S  
ROTATING SENSOR

## BENEFITS

- Cost effective and reliable surveillance against asymmetric threats
- Full 360-degree panoramic coverage with a single sensor
- Long range surveillance up to the horizon
- Day and night panoramic awareness even in adverse weather conditions
- Automatic, simultaneous tracking of all threats with superior image quality
- Compact, robust, lightweight equipment, for a fast deployment
- Fully passive system, totally undetectable unlike radar
- Gyro-stabilization option for shipborne installations

→ Asymmetric threats detection

### CONTROL AND DISPLAY SOFTWARE

Operating system: PC Windows – multiple screen and touch screen capabilities

Software functions: Get full advantage of Spynel sensor with Cyclope software. Cyclope provides, at a glance, **real time panoramic display** (360° strip, annular, radar & zoom views), **unlimited targets designation and tracking**, **immediate threat location** (azimuth, elevation, distance), GPS, AIS and radar **data integration**, automatic control of PTZ systems for target identification, **forensic capabilities** (timeline, sequence storage and playback), spatial and temporal **bookmarks**, multiple **threats displayed on situation map**, fine image stabilization and more...
