

COVERT POLICING

DNA-Tracker® - (IMEI/IMSI/MAC) CoverTracker®

DNA-Tracker's CoverTracker is a cost-effective, hardware and software solution, which instantly identifies mobile devices within a targeted area.

The compact, mobile DNA-Tracker unit can instantly capture mobile device ID codes via GSM, Bluetooth and Wi-Fi protocols, delivering robust intelligence gathering solutions, along with viable lines of enquiry for a variety of intelligence led operations.

DNA-CoverTracker is a compact, fully mobile self-contained unit, which can be rapidly deployed and operated with a minimum of basic training.

This essential covert policing tool is now available at a cost-effective price point, hitherto unheard of in the security and policing industry.
