

CAESAR

Transcription Software

Applications

- ◆ Effective delivery of texts of speeches at
FORUMS,
CONFERENCES,
MEETINGS,
SESSIONS,
NEGOTIATIONS,
LECTURES and INTERVIEWS
only minutes after they have finished

Used by:

- ◆ Transcriptionists of governmental institutions and private services
- ◆ Transcriptionists of governmental institutions and private services
- ◆ Operators for text decoding in police departments and forensic audio
- ◆ Office workers and journalists
- ◆ Any organizations or individuals that have to

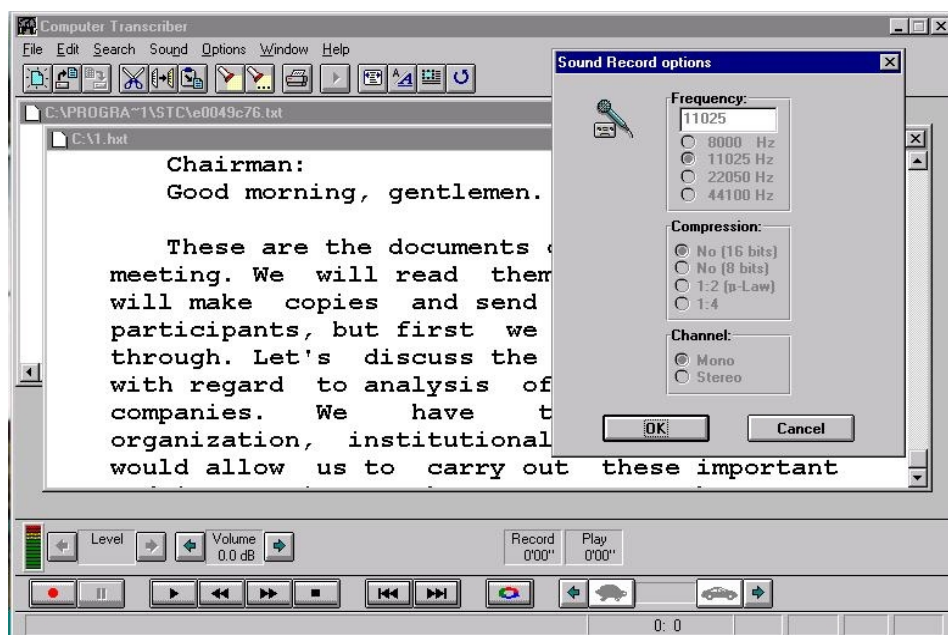

Advantages

- ◆ Fast and reliable text decoding of sound recordings
- ◆ Automated links between the text and the corresponding sound fragment
- ◆ Playback speed optimizing, slowing or increasing without voice or speech quality loss
- ◆ Caesar has been developed especially to meet all requirements of office staff and transcriptionists who transcribe speech content from audio. Caesar's effectiveness and reliability has been proven over a long period of use in important organizations.

Features

Caesar is a compact PC Transcription application which reduces production time of text and reliably stores both sound and text.

- ◆ It is very convenient to process recordings of any type:
 - records of conferences
 - medical records
 - meetings and negotiations
 - lectures
 - interviews
 - business or private conversations
- ◆ The working speed can be noticeably increased if using Caesar transcription software instead of a conventional tape recorder.
- ◆ Possibilities of noisy speech decoding are dramatically increased. In addition mechanical wear on the tape recorders and tape is reduced.

Functional Features

- ◆ Only Caesar has a unique capability to link automatically the typed text to the corresponding speech fragment. It allows to listen immediately to the speech fragment corresponding to the cursor position in the text.
- ◆ The speech intelligibility can be increased by slowing down playback speed without voice pitch or sound quality distortions or by multiple listening to the corresponding speech fragment in ring mode.

◆ Text editor functions:

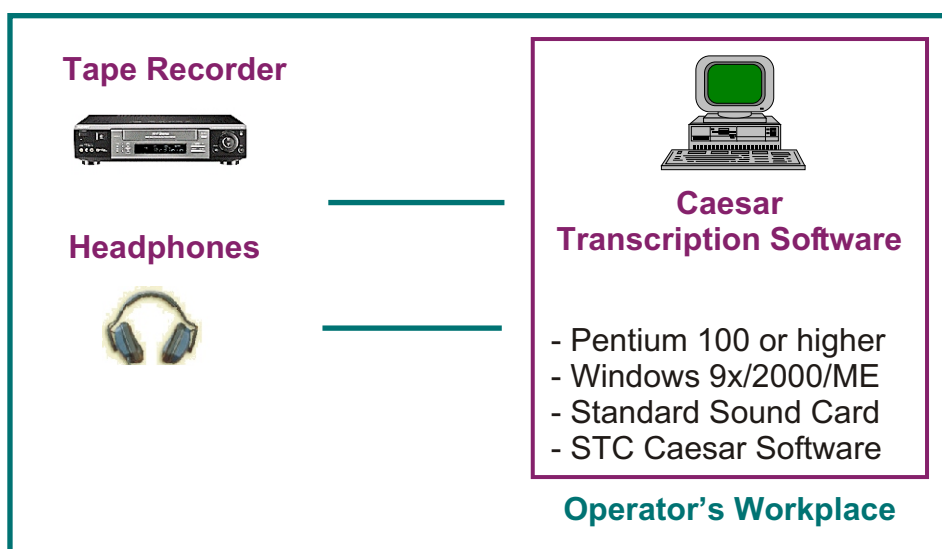

- ◆ paragraph formatting
- ◆ text search and replace
- ◆ macro usage, etc.

◆ Digital tape recorder functions:

- ◆ stop
- ◆ playback
- ◆ fast forward/ rewind
- ◆ listening in ring mode
- ◆ time markers usage
- ◆ increasing or reducing the playback speed without voice or speech quality losses
- ◆ sound level control for sound recording and playback.

- ◆ Automatic high quality input of speech signals from a tape recorder, portable voice logging device, telephone line or microphone into the computer.
- ◆ The transcriber does not add any speech signal distortions and provides high quality sound, corresponding to the international standards and meeting the requirements of experts.
- ◆ Simultaneous playback of any part of the already entered signal and recording and input of a new signal are supported.
- ◆ Storing hours of the inputted speech on the computer hard disk is provided.
- ◆ High productivity and comfort of the user's work is achieved by the optimal combination of the specialized text editor and digital tape recorder.

Caesar Software is available in two versions - with STC professional sound card or with a standard sound card support
