

# "Forensics Off-Road" Cyber experts"

DI.

**FORCE**  
SOLUTIONS

## Intervention & Mobile Laboratory

*"FIRST EXTREME FORENSIC MOBILE LABORATORY, NEVER BUILD FOR A LAW ENFORCEMENT AGENCY"*

## F.O.R.C.E. ....

This new generation of "High Tech Forensic Solutions" mobile laboratories was designed by the most advanced firms in charge of tailored "high tech forensic Solution" understanding the imperative needs of the "Police Chain of Command" and also the necessary and ergonomic set-up dedicated to forensic examiners down the road.

## TRACIP.....

*Central French reference digital expertise.*

Tracip was born from the experience of a team of software engineers specializing in the investigation of digital media. Using daily, the main tools of investigation, our specialists have naturally been led to test the new tools, advise users to become distributors in France and trainers of the key technologies of digital computer forensics.

Tracip is able to provide its expertise and experience to those who must lead or carry out numerical investigation on a regular basis. In addition to expert services for digital media, we offer advice, equipment, training and assistance in the creation or development of a cell investigation. Whether you are an investigator, lawyer, HR, CIO and Head of Compliance, TRACIP will find you the best solution for your situation.

## CSI-EXPERTISE .....

**Crime scene Investigation & Portable Electronic Devices Forensic**

CSI-Expertise was created by two Law enforcement officers:

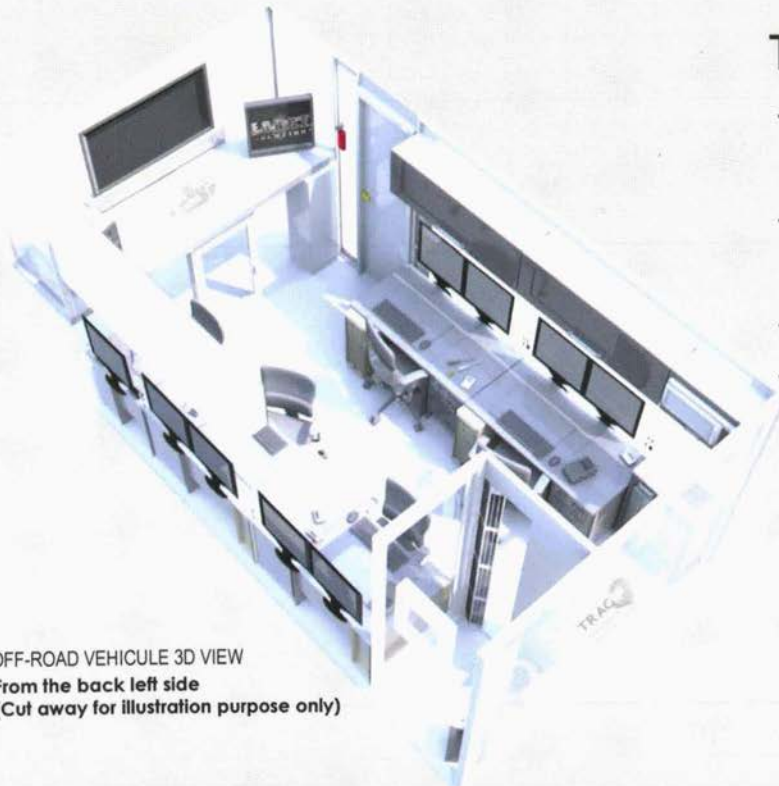

- a Crime Scene Investigator (with 25 years as a crime scene Investigator for a major metropolitan Police department in the South Florida area.
- a former Police Officer with the gendarmerie Nationale ( over 12 years of investigative experience in France) also trained on Forensic Portable Electronic Devices technics.

This team got all the necessary skills (almost 40 years of combined experience) and due-diligence resources to set-up the most advanced Law Enforcement Forensic Mobile laboratory "On or Off" the roads.

Based on their expertise, remote and extended operations can be handled easily and in comfort as these mobile laboratories provide all the required resources with a maximum of safety and security.

# Tailored Solution for Synchronized Operation from Police Headquarters

OFF-ROAD VEHICLE 3D VIEW  
From the back left side  
(Cut away for illustration purpose only)

## The solution

- Most sophisticated onboard Computer Forensic Equipment capacity, with room for any additional equipment;
- Ability to Synchronize Operation from Police Headquarters; (live video, microphone monitoring, video conference, GPS tracking)
- Totally Scalable and Upgraded fleet solutions;
- Designed for Safety and Security operations "On the Road" and/or "Off-Roads" on a fast deployment basis.

***Our Law Enforcement "Off-Road" Solutions could also be adapted to other Law enforcement units:***

- Crime Scene Investigation Mobile Unit
- Communication Interception vehicle
- Negotiation Response Team
- Mobile command center
- VIP Extraction vehicle
- Special I.T Forensic Vessel  
(Offshore Operations)

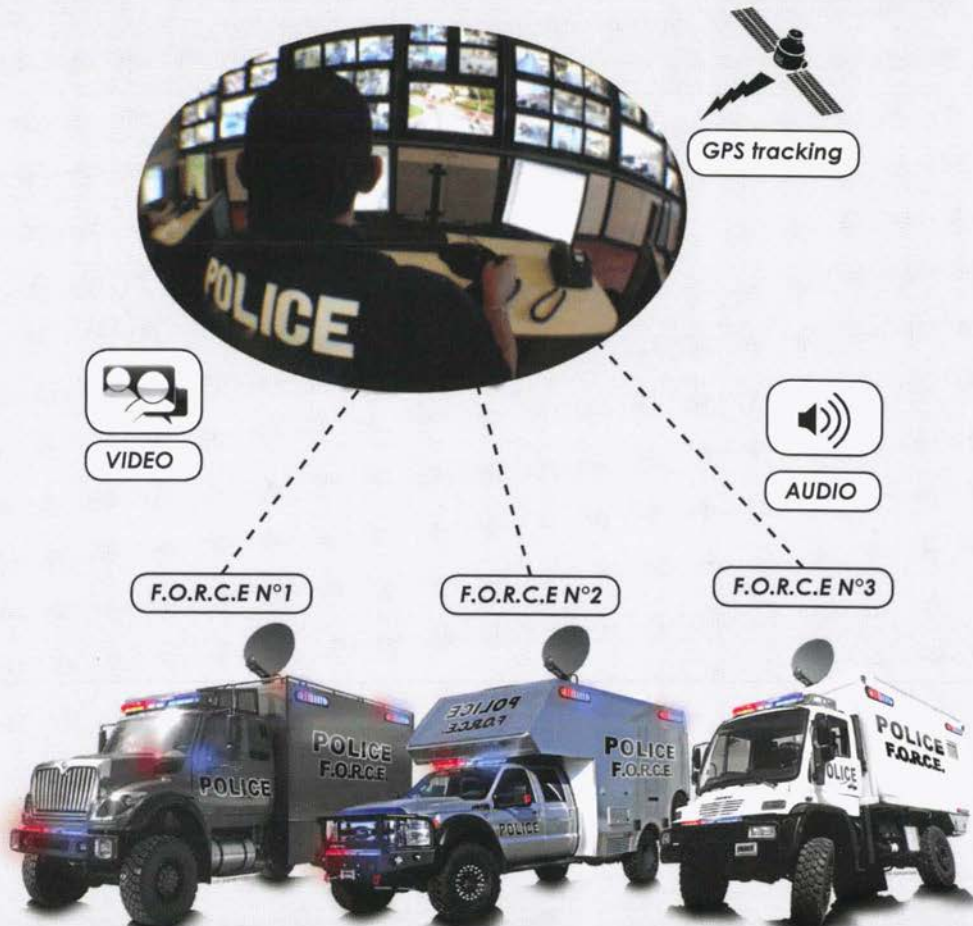

# Intervention & Mobile Laboratory

## Purpose of these vehicles

During an investigation, **time efficiency is the essence of success**. Today's most important aspect, is to be able **to react on time to Cyber Issues** and/or **to get the capacity to extract and analyse data from computer, GPS, Mobile-Phones, External Storage** (HD, usb thumb drive, memory Cards) with a full capacity for sharing those data between investigators.

That is the **purpose of building the most advanced Off-Roads Truck solution** for Law Enforcement Agencies.

Since most of the **tactical operations** has to be **operated simultaneously** in order **to surprise the targets** or **to get efficient intel resources** on the field, we are offering a scalable fleet of vehicles dedicated to those operations **with an integrated communication system** to **synchronize orders** between each vehicles and **directly from the L.E Agency Headquarter** in charge of the operation.

# Custom Made Vehicles

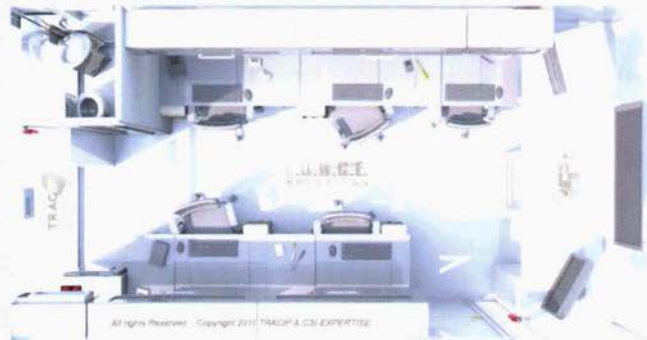

To build the **most advanced solution for Law Enforcement Agencies**, we selected two of the greatest worldwide specialist manufacturers who already build expedition vehicles in the United States for different kind of applications:

- The first one is specialized on "**Extreme Off-Road**" conditions;
- The second is most "**Cost Effective**", based on a regular 4WD vehicle.

These models are the result of years of research and development coupled with **countless miles of world travel in the harshest of conditions**.

Based on their experience in this industry, we are able to provide a fleet of all wheel drive vehicle, whether it is 4x4, 6x6 or 8x8; designed **to be strong and easily serviceable**.

**Every truck body design has been engineered for a specific function and performance requirement.**

Each model shares common balanced, stability, reliability, marine grade utility, comfortably balanced interior and a huge list of options **to meet any Law Enforcement Agencies requirements**.

Our team is dedicated **to make overland operations available** to as many as possible by **offering a top quality vehicle at affordable prices**. This commitment is achieved by efficient manufacturing processes that do not require huge overheads to be passed on to the customers.

When choosing a model from our line-up or choosing a custom build, **you can count on uncompromising quality at an affordable price in order to get the most sophisticated Forensic Laboratory "On or Off the Roads"**.

Our vehicles are custom designed and **user friendly control centers** conducive **for multiple operators**.

## Always 4WD adapted solutions

### Ford G550 4WD

The most adapted and cost effective 4WD vehicle for a quick deployment of 4 Examiners and 1 Communication Operator with the perfect minimum forensic setup to succeed even on Off-Roads situations with extreme conditions.

**[V6 Engine 300hp/19500lbs - 8.5t GVWR]**

### Mercedes Unimog U500

For the past 60 years, this chassis has been recognized as one the most reliable 4WD truck on the market with a very low cost for maintenance. This heavier chassis can also support more forensic equipment for the fast deployment of 2 to 4 Examiners and 1 Communication Operator even on off-roads situations with extreme conditions.

**[V6 engine 260hp/33000lbs - 15t GVRW]**

### International 7500 Workstar 4x4

Heavier 4WD chassis to support even more forensic equipment for the deployment of 4 Examiners and 1 Communication Operator even on Off-Roads situations with extreme conditions.

**[V6 Engine 350hp/33000lbs - 15t GVWR]**
