Facebook Relations Analysis

One of the most popular social network in the world with 400 million subscribers, with an increasingly positive and unstoppable trend.

One of the most widely used communication tools that with features like Chat, Messaging, Events, Groups... makes the interaction between users easy and immediate.

This product from one or more telecommunication interceptions made through the Genesi platform, allows you to analyzing communications, lick in detail and make an analysis of relations of the people involved.

USER DATA LIST

The application lists all users who come into contact with the users intercepted highlighting the following features:

- Profile Photo;
- Name assigned on Facebook;
- User ID Facebook (remember this is a univocal ID);
- the number of messages exchanged with other registered users.

RELATIONSHIPS CHART

Selecting one of the filed users, the system make the analysis of the relations and the messages exchange. The result is a "tree" of "communications" occurred, as shown in the figure on the right. In the center there is the Facebook account previously selected and around the people with whom he entertained conversations. In red is highlighted the amount of messages exchanged.

Reports and contents of messages

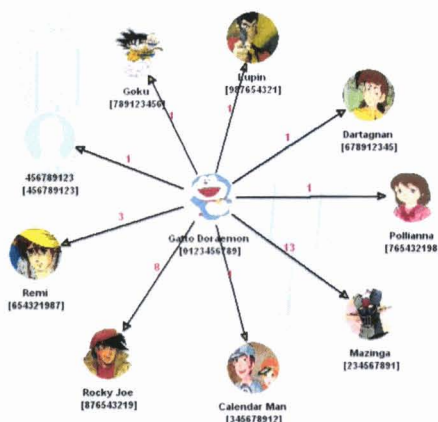

CHAT MESSAGE

Selecting to the left a line of the chart or an arrow that connects a Facebook user to another, is possible to consult the messages exchange happened during the time.

The visualization grate offers the possibility to realize fast filters to be able to reach as soon as possible the necessary information.

SIMPLE AND IMMEDIATE VISUAL IMPACT

The linear and intuitive graph offers the chance to see the friends of a person, his talks and their frequencies...
