

First choice of military and
specialist forces worldwide

AUDIOTEL
INTERNATIONAL

Your first line of defence

Technology used by insurgents and terrorists is increasingly sophisticated and readily available; countering this threat requires the most reliable and advanced equipment possible.

For over 30 years Audiotel International has been at the forefront in developing equipment to combat this threat and provides the ultimate in your protection.

Modern day conflict is asymmetric with our forces fighting an un-conventional enemy. In Audiotel International we have made it our business to work closely with the Military around the world to match our product range with their latest evolving requirements.

Our extensive product portfolio includes counter surveillance scanners to detect audio/visual transmissions, as well as audio surveillance equipment to ensure you are always one step ahead. In addition we offer a range of search tools to locate electronic, corrosive and metallic targets both buried and on the surface.

We have the intelligence to protect, giving you the peace of mind that your forces and key defences remain safe and intact.

Providing protection the world over

Audiotel International has built a reputation on delivering the best equipment to Military and Specialist Forces in the UK and around the world. We have provided equipment to Specialist Search Teams, Special Forces, TSCM Search Teams and Diplomatic Security Officers employed in counter terror protection.

Our wide range of state-of-the-art products are specially designed to offer flexibility for different users, applications and environments. Brief product descriptions are provided on the opposite page and are also available in greater detail online at

www.audiotel-international.com

Reliable and simple to operate

Audiotel International has extensive experience in developing equipment to meet both NATO specifications and defence standards using military specification materials and the highest standard manufacturing processes.

Our total commitment to excellence recognised by ISO 9001:2008 certification means that our products are made to the highest quality and are built to be robust and reliable.

All of our products are designed for simple operation with the need for training and support minimised. We do offer a range of training and support options to suit your needs.

Working closely with our customers, Audiotel International is constantly developing new products to protect you from the next threat. You can find the most up-to-date information on these at our website

World-class products from Audiotel International

Working closely with armed forces around the world to understand their requirements has enabled our Design Team to develop equipment that remains ahead of the threat. Here is a brief description of a few of the products we offer:

Counter-surveillance receivers

As technology advances and eavesdropping devices become more complex, Audiotel International has developed the Scanlock M3 to keep you safe. It is not only able to search and locate signals, but in addition is the only product on the market which can identify the type of signal being transmitted.

Product Scanlock M3.

Non Linear Junction Detectors

Audiotel International offers a range of advanced NLJDs to meet all your detection needs. The SuperBroom Advanced is suitable for internal or external environments, above or below ground searching and capable of detecting electronic devices even when they are turned off.

The Detect IV is a revolutionary all in one multi-threat detector. Combining the advanced technology of broadband detection, harmonic receiving, Non Linear Junction Detection (NLJD) and metal detection, resulting in a versatile search and locate counter surveillance tool.

The Artemis Advanced is our most advanced NLJD to date with market leading features for specialist search. Suitable for external or internal detection, this user configurable detector will locate electronic, corrosive and metallic targets both buried and on the surface. It is simple to operate, robust and highly capable.

Together these offer invaluable protection against a wide spectrum of threats and provide a simple, effective and easy to use integrated solution.

Products SuperBroom Advanced, Artemis Advanced and Detect IV.

Fixed and mobile room protection

Room Guard is a detector that is always on guard protecting against all kinds of radio eavesdropping devices – it uniquely highlights the use of Wi-Fi, mobile phone networks, radio signals and Bluetooth transmissions.

This sensor is also available in a mobile portable Meeting Guard variant specifically aimed at office environments.

Products Room Guard, Casino Guard and Meeting Guard.

Weight Management Systems

The unique UHS2 weight management system has been designed specifically to overcome the burden of the increased load. The versatile design of UHS2 makes it compatible with NATO style Enhanced Combat Body Armour, utilising the universal MOLLE (Modular Lightweight Load-carrying Equipment) system. **Product** UHS2.

Audio Surveillance Equipment

Audiotel International offers high quality, evidential audio surveillance equipment suitable for a variety of covert applications. The range includes short and long range transceivers, with the capability to be body worn, quick plant, throw away or host/Trojan. With short and long range antennas being supported by repeaters as well as internet listening capability through a web browser, gives you the flexibility to listen to audio from anywhere in the world. We also offer through the wall listening capability that includes dual Knowles microphone, dual Probe microphones and dual Accelerometers. **Products** Visit the restricted area of our website for more information.

UK made, trusted the world over

All our equipment is designed, developed and manufactured at our well equipped and secure facilities in the UK.

Using stringent levels of quality control, high specification materials and innovative manufacturing techniques, we produce security equipment that is reliable, robust and effective.

We have a worldwide reputation for excellence - which is underlined by the fact that we export more than 70% of our products to over 90 countries around the globe through our international distributor network.

Make Audiotel part of your defence team.
