

Professional Services for Law Enforcement

The maker of the leading digital forensics software used by law enforcement around the world now provides professional services designed to help law enforcement handle any criminal investigation, reduce case backlog and minimize the risk of missing critical evidence.

AccessData's comprehensive Law Enforcement Services alleviate the digital burdens now commonplace among law enforcement agencies, such as case backlog, lack of local expertise and urgent investigations that can't wait for the regional lab. These obstacles put a great deal of pressure on officers devoted to protecting the citizens in their communities and taking criminals off the streets.

Expertise and Innovation

AccessData professionals have extensive experience, and are not only the best at what they do, they are experts in utilizing AccessData's tools. Recognized by *SC Magazine* as the company *"likely to set the computer forensic standard for the foreseeable future,"* AccessData delivers the most innovative digital forensics technologies. Nobody knows more about these products than our professional services team. Combine expertise with the most powerful tools on the market, and you have a partner in crime fighting you won't find anywhere else.

Expert Witness Testimony

Because we develop the industry's leading technology used to analyze digital evidence, we are also the best choice when it comes to choosing an expert witness. As digital forensics professionals, we adhere to civil and criminal guidelines and provide objective analysis and reports, advising you every step of the way on the case at hand and how the digital evidence may be interpreted.

Case Development

AccessData Professional Services will ensure you always have access to all the electronic evidence and supporting analysis you need, so there are no surprises from the other side. We assist you in fully understanding the technology and evidence, review reports and testimony from an opposing expert witness, and we will test the validity, accuracy and scientific merits of opposing counsels' reports on all digital evidence.

Create a
customized
package tailored to your needs
