German Technology & Expertise in the Global Market

AGT is a premier, German, security solutions provider, with strong consultancy focus and deep system integration 'knowhow'. AGT has a mandate to bring the latest developments to clients in emerging markets enabling the transfer of advanced European security technology.

New security threats are developing continuously and organizations are challenged to respond to the elevating levels of threat caused by such rapid breakthroughs. AGT enables clients to stay ahead of these obstacles and is relied upon by law enforcements agencies to protect highly sensitive data for their governments. AGT is also experienced in combatting corporate espionage and has an enviable portfolio of clients that are private and public enterprises. A large number of international banks use AGT to protect account information from identity fraud.

AGT competencies are:
- Legal interception
- Encryption
- Digital forensics
- Professional services

AGT partner with world-class technology providers to deliver tailored, turnkey security for lawful interception operations and, this forms the cornerstone of the business. Data and voice encryption are another competency and AGT successfully delivered several national encryption projects. AGT are also expert in digital forensics and have been responsible for developing several National Laboratories in the MENA region.

Custom Made Security

PROFESSIONAL SERVICES

AGT offers a wide range of professional services to support clients in introducing effective IT-security measures. The AGT process view enables delivery of high quality results at any stage of a security introduction and management process through the transfer of European 'knowhow'.

A critical view is taken of clients' infrastructures and potential for optimisation is identified. AGT develop security concepts, security awareness programs and detailed security trainings.
