Technical Surveillance Units and Forensic Experts often face a situation where they need to access a running computer system without shutting it down in order to prevent data loss or save essential time during an operation. In most cases, the Target System is protected with a **password-enabled Screensaver** or the target user is not logged in and the **Login Screen** is active.

FinFireWire enables the Operator to quickly and covertly **bypass the password-protected** screen and access the Target System without leaving a trace or harming essential forensic evidence.

QUICK INFORMATION	
Usage:	· **Tactical Operations**
Capabilities:	· **Bypass User Password** · **Covertly Access System** · **Recover Passwords from RAM** · **Enable Live Forensics**
Content:	· **Hardware/Software**

Usage Example 1: Forensic Operation

A **Forensic Unit** entered the apartment of a Target and tried to access the computer system. The computer was **switched on but the screen was locked.**
As they were not allowed, for legal reasons, to use a Remote Monitoring Solution, they would have **lost all data** by switching off the system as the **hard-disk was fully encrypted.** FinFireWire was used to **unlock the running Target System** enabling the Agent to **copy all files** before switching the computer off and taking it back to Head-quarters.

Usage Example 2: Password Recovery

Combining the product with **traditional Forensic applications** like Encase®, Forensic units used the **RAM dump functionality** to make a snapshot of the current RAM information and **recovered the Hard-Disk encryption passphrase** for TrueCrypt's full disk encryption.
Feature Overview

· **Unlocks User-Logon** for every User-Account
· Unlocks **Password-Protected Screensaver**
· Full Access to **all Network Shares** of User
· **Dumps full RAM** for Forensic analysis
· Enables live forensics **without rebooting** the Target System
· User password is **not changed**
· Supports **Windows, Mac and Linux systems**
· Works with **FireWire/1394, PCMCIA and Express Card**

For a full feature list please refer to the Product Specifications.

FINFISHER™
IT INTRUSION

Product Components

FinFireWire - Tactical Unit

· Complete Tactical System

Point-and-Click User Interface

· Easy-to-use User Interface

Connection Adapter Cards

· PCMCIA and ExpressCard Adapter for
  Target Systems without FireWire port

Universal FinWire CableSet

· 4 pin to 4 pin
· 4 pin to 6 pin
· 6 pin to 6 pin

Usage

1. Go to your Target System

2. Start FinFireWire

3. Plug in FireWire Adapter & Cable

4. Select a Target

**5. Wait until System
   is unlocked**
